EXAMINER'S COMMENT/REASON FOR ALLOWANCE

In view of applicant's Appeal Brief filed 01 December 2007, claims 2, 4, 7-9 and 12-32 are in condition for allowance, in which further consideration has been given to applicant's arguments presented in the Appeal Brief.

In view of applicant's argument pertaining to the "Rejections Under §112" beginning on page 6 of the filed Brief, the rejection under 35 U.S.C. §112, second paragraph, indicated in the Final Rejection mailed 01/24/2006 has been withdrawn.

In view of applicant's arguments pertaining to at least independent claim 14 beginning on page 8 of the filed Brief, where summararily Cho and Rude do not teach or suggest all the claimed feature of claim 14, is found persuasive. The prior art of record fails to teach or make obvious a hinge structure for a flat visual display device, the hinge structure requiring the structural combination of: a braking member made of engineering plastic and provided on an outer circumference of a rotation shaft which is inserted into fixed and pivotal plates, the braking member comprises: a frictional face contacting with the rotation shaft for providing braking force, and braking-tightening planes extended from the frictional face and having contact faces into which a leaf spring and a braking-adjustable member are inserted for adjusting braking force; a braking housing around the braking member for maintaining the strength of the braking member; and at least one elastic member having a first end coupled to one of the pivotal plates and a second end coupled to the fixed plate, wherein the at least one elastic member is configured to generate a restoring force to offset the weight of the flat visual display device so as to adjust the flat visual display device with a slight amount of force, whereby the weight of the flat visual display device is supported and the movement thereof is compensated.

Claims 12, 13 and 27-32, which have been indicated as being withdrawn from consideration as being directed to a non-elected invention, as indicated in the Office action mailed 01/24/2006, have been rejoined, and considered on their merits. Therefore, any implied or expressed restriction requirement previously presented has been withdrawn. Thus, claims 12, 13 and 27-32 are in condition for allowance since the prior art of record fails to teach or make obvious a hinge structure for a display device, requiring the structural combination of:

a fixed plate having a main body portion and first and second arms that extend from the main body portion; a rotation shaft that passes through the first and second arms of the fixed

plate; first and second pivotal plates configured to be attached to a display, wherein the first and second pivotal plates are fixed to first and second ends of the rotation shaft such that the pivotal plates rotate with the rotation shaft relative to the fixed plate; and a hinge-fixing unit having first and second rotation shaft guides which receive the first and second ends of the rotation shaft, wherein the hinge-fixing unit is configured to restrict shaking of the rotation shaft, and wherein the fixed plate is attached to and supported by the hinge-fixing unit.

Concerning independent claim 20, the prior art of record fails to teach or make obvious a hinge structure for a display device, requiring the structure combination of a fixed plate having a main body portion and first and second arms that extend from the main body portion; a rotation shaft that passes through the first and second arms of the fixed plate; first and second pivotal plates, wherein the first and second pivotal plates are fixed to first and second ends of the rotation shaft such that the pivotal plates rotate with the rotation shaft relative to the fixed plate; and a braking unit which is mounted on the fixed plate, wherein the braking unit is configured to apply a frictional force to the rotation shaft to limit rotation of the rotation shaft relative to the fixed plate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
